Understanding Incoterms® is a vital part of International Trade.

Put simply, Incoterms® are the selling terms that the buyer and seller of goods both agrees to. The Incoterm® clearly states which tasks, costs and risks are associated with the buyer and the seller. The Incoterm® is agreed between the buyer and seller and states when the seller's costs and risks are then transferred onto the buyer.

Incoterms® are also referred to as International Commercial Terms, which are published by the International Chamber of Commerce (ICC), which relate to International Commercial Law. They are accepted by governments and legal authorities around the world. The ICC published new Incoterms® 2020 that have come into effect from the 1st of January 2020. The ICC originally published Incoterms® in 1936 and have continually published updates to reflect the changes to the Global Trade environment. It's important that all parties involved in trade clearly understand the changes and how they apply to global supply chains.

The IncoDocs chart displays Incoterms® 2020 in an easy to understand format. Our chart states each Incoterm® and explains the obligations and charges that are accepted by the seller and the buyer. This is general information for guidance purposes only. For a full and complete description, refer to the full version of Incoterms® 2020 by the International Chamber of Commerce at the ICC website.

Rules for any mode or modes of transport:

EXW - Ex-Works or Ex-Warehouse

“Ex Works” means that the seller delivers when it places the goods at the disposal of the buyer at the seller’s premises or at another named place (i.e., works, factory, warehouse, etc.). The seller does not need to load the goods on any collecting vehicle, nor does it need to clear the goods for export, where such clearance is applicable.

FCA - Free Carrier

“Free Carrier” means that the seller delivers the goods to the carrier or another person nominated by the buyer at the seller’s premises or another named place. The parties are well advised to specify as clearly as possible the point within the named place of delivery, as the risk passes to the buyer at that point.

CPT - Carriage Paid To

“Carriage Paid To” means that the seller delivers the goods to the carrier or another person nominated by the seller at an agreed place (if any such place is agreed between parties) and that the seller must contract for and pay the costs of carriage necessary to bring the goods to the named place of destination.

CIP - Carriage And Insurance Paid To

“Carriage and Insurance Paid to” means that the seller delivers the goods to the carrier or another person nominated by the seller at an agreed place (if any such place is agreed between parties) and that the seller must contract for and pay the costs of carriage necessary to bring the goods to the named place of destination.

“The seller also contracts for insurance cover against the buyer’s risk of loss of or damage to the goods during the carriage. The buyer should note that under CIP the seller is required to obtain insurance only on minimum cover. Should the buyer wish to have more insurance protection, it will need either to agree as much expressly with the seller or to make its own extra insurance arrangements.”

DAP - Delivered At Place

“Delivered at Place” means that the seller delivers when the goods are placed at the disposal of the buyer on the arriving means of transport ready for unloading at the named place of destination. The seller bears all risks involved in bringing the goods to the named place.

DPU - Delivered At Place Unloaded

“Delivered At Place Unloaded” means that the seller delivers when the goods, once unloaded, are placed at the disposal of the buyer at a named place of destination. The seller bears all risks involved in bringing the goods to, and unloading them at the named place of destination.

DDP - Delivered Duty Paid

“Delivered Duty Paid” means that the seller delivers the goods when the goods are placed at the disposal of the buyer, cleared for import on the arriving means of transport ready for unloading at the named place of destination. The seller bears all the costs and risks involved in bringing the goods to the place of destination and has an obligation to clear the goods not only for export but also for import, to pay any duty for both export and import and to carry out all customs formalities.

Rules for sea and inland waterway transport:

FAS - Free Alongside Ship

“Free Alongside Ship” means that the seller delivers when the goods are placed alongside the vessel (e.g., on a quay or a barge) nominated by the buyer at the named port of shipment. The risk of loss of or damage to the goods passes when the goods are alongside the ship, and the buyer bears all costs from that moment onwards.

FOB - Free On Board

“Free On Board” means that the seller delivers the goods on board the vessel nominated by the buyer at the named port of shipment or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel, and the buyer bears all costs from that moment onwards.

CFR - Cost and Freight

“Cost and Freight” means that the seller delivers the goods on board the vessel or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel. The seller must contract for and pay the costs and freight necessary to bring the goods to the named port of destination.

CIF - Cost, Insurance and Freight

“Cost, Insurance and Freight” means that the seller delivers the goods on board the vessel or procures the goods already so delivered. The risk of loss of or damage to the goods passes when the goods are on board the vessel. The seller must contract for and pay the costs and freight necessary to bring the goods to the named port of destination.

“The seller also contracts for insurance cover against the buyer’s risk of loss of or damage to the goods during the carriage. The buyer should note that under CIF the seller is required to obtain insurance only on minimum cover. Should the buyer wish to have more insurance protection, it will need either to agree as much expressly with the seller or to make its own extra insurance arrangements.”

What does ‘Freight Collect’ and ‘Freight Prepaid’ mean?

Freight Collect and Freight Prepaid are common terms used in International Freight. It is very important to understand the difference, it is basically a statement of who will be paying for all the International freight charges. If you export your goods on ‘Freight Collect’ terms (EXW, FCA, FAS and FOB are all Freight Collect terms) that means that the importer (your buyer) will ‘collect’ and pay all of the freight charges on their side, you will not have to pay any freight at all.

If you are the exporter and sell the goods on CFR, CIF, CPT, CIP, DAP, DPU or DDP terms, this means that you will pay for the freight charges (‘Freight Prepaid’ – you will pre-pay the freight charges). These are linked to the selling terms of your invoice, if you are selling your goods on ‘FOB’ terms (Free on Board) then you are only covering the costs to get the goods loaded on board the vessel. All charges thereafter will be charged to the receiver of the goods (consignee) – so it will be Freight Collect. These freight terms are stated on the Bill of Lading, the document issued by the shipping line or freight forwarder.

Resources

International Chamber of Commerce (ICC) Incoterms® 2020

When exporting product around the world there are different shipping methods to consider. It mainly depends on the overall product packing sizes, cubic measurement, or total weight of the products to be shipped.

20'GP Shipping Container (General Purpose)

The 20' container is the most cost efficient way to transport the goods to your buyer. It is known as a 'Twenty-Footer' to signify the overall length of 20 feet. Products are usually packed inside cartons, then cartons stacked and wrapped onto pallets and loaded inside the container for transport. A popular way of exporting palletised cargo is 2 pallets high, 2 pallets wide, 8 pallets deep – 16 pallets total.

40'GP Shipping Container (General Purpose)

The 40' shipping container is the same design as the 20' container but just double the length. So the overall length is 40 feet and can hold double the amount of cargo.

40'HC Shipping Container (High-Cube)

The 40' High Cube shipping container is the same overall length as the 40'GP but it is approximately 40cm taller than the GP. This slight increase in height allows for an extra 10-15% of cargo to be loaded inside. It also allows for some different packing methods which can fit extra cargo otherwise unable to load inside a normal 40'GP container.

LCL Cargo (Less Than Container Load)

LCL shipping is a shipping method used for smaller cargo when the overall size of the goods for export is not big enough to fill a 20' container. When LCL shipping is used, the goods are still loaded inside a 20' shipping container and transported the exact same way but the goods are loaded inside a shared shipping container along with other party's cargo to fill the container (a consolidated container). The freight cost is charged out depending on the overall product size or weight, the shipping rate will be charged out per cubic meter of cargo (m³) or per Metric Tonne (1,000kg) in weight, whichever is greater. There are more handling costs involved when shipping LCL cargo as pallets have to be loaded and unloaded more often, incurring more handling charges.

Breakbulk Cargo

Breakbulk Cargo is not a very popular shipping method as it's generally used for oversized cargo that can't fit inside shipping containers. Any cargo that exceeds the length, height or weight restrictions of a 40' container will be shipped by breakbulk cargo. Cargo is loaded on top of the deck of the vessel and has to be carefully loaded into place on the top of the deck by crane. Large machinery, boats and steel are examples of goods that are exported around the world by Breakbulk Cargo.

The most popular shipping method all over the world is the popular 20 foot long shipping container (20' container). Shipping containers are the most efficient means of transport all over the world as they are designed to seamlessly transport between trucks, trailers, port handling equipment, shipping vessels and railheads. They exist in many variations to transport different size and shaped cargo.

Dry Cargo Containers

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m³)	Width (m)	Height (m)

Unit Load Devices are specially designed cargo pallets and containers that are used to load freight, luggage and mail onto aircraft. These devices allow large quantities of cargo to be bundle and strapped together securely onto 1 mobile unit, so they can be safely and securely transported.

The International Air Transport Association (IATA) is responsible for publishing regulations around the use of Unit Load Devices. They can also be referred to as a 'cargo pallet' or a 'PMC pallet'.

M-1H

IATA ULD code: AMD contoured

Rate class: Type 2H

Description: Main-deck upper contoured container. Door is canvas with built-in net door straps.

Suitable for: 747F, 747 Combi/777F center loading only

Maximum gross weight: 6,800 kg (14,491 lb)

Tare weight: 370 kg (816 lb)

AS1825 volume: 21.2 m3 (750 ft3)

Dimensions: 96 in (243.8 cm) x 125 in (317.5 cm) x 118 in (299.7 cm)

M-2

IATA ULD code: AGA 20-ft box container

Prefixes: ASE

Rate class: Type 1

Description: Main-deck container. Door is solid.

Suitable for: 747F, 747 Combi (243.8 cm) 777F center loading only 238.5 in

Maximum gross weight: 11,340 kg (25,000 lb)

Tare weight: 1,000 kg (2,204 lb)

AS1825 volume: 21.2 m3 (750 ft3)

Dimensions: 96 in (243.8 cm) x 238.5 in (605.8 cm) x 96 in (243.8 cm)

M-6

IATA ULD code: PGA 20-ft flat pallet with net

Prefixes: PGA, PGE, PGF, PSA, PSG, P7E, P7F, and P7G

Rate class: Type 1

Description: Main-deck pallet squared off to 244 cm (96 in) high.

Suitable for: 747F, 747 Combi, 777F

Maximum gross weight: 11,340 kg (25,000 lb) (605.8 cm)

Tare weight: 500 kg (1,102 lb)

AS1825 volume: 33.7 m3 (1,190 ft3)

Dimensions: 96 in (243.8 cm) x 238.5 in (605.8 cm) x 96 in (243.8 cm)

M-6 (118"H)

IATA ULD code: PGA 10-ft high, 20-ft flat pallet with net

Prefixes: PGA, PGE, PGF, PSA, PSG, P7A, P7E, P7F, and P7G

Rate class: Type 1

Description: Main-deck pallet squared off to 299.7 cm (118 in) high.

Suitable for: 747 Combi, 777F 238.5 in 747F through side cargo door only

Maximum gross weight: 11,340 kg (25,000 lb)

Tare weight: 500 kg (1,102 lb)

AS1825 volume: 39.6 m3 (1,400 ft3)

Dimensions: 96 in (243.8 cm) x 238.5 in (605.8 cm) x 118 in (299.7 cm)

Freight Forwarders are companies which specialize in all of the components of International Freight and logistics. They are experts which have experience and understanding of the complex transport and logistics arrangements that are involved to get your goods delivered all the way through to your International customers. When your goods leave your warehouse, there are so many important processes involved to get goods cleared through the port, comply with all regulations, supply the correct documentation, delivered to the correct container yard and loaded onto the correct vessel. Freight forwarders also specialize in integrated modes of transport, so can easily arrange the movement of freight between road, rail and sea.

Freight forwarders have vast experience dealing with complex customs regulations, different port services, quarantine/inspections services, stevedores and shipping lines. You should carefully research and deal with an experienced freight forwarder who takes the time to come out and meet at your premises to clearly understand your business and your requirements. Don't just deal with a freight forwarder based on price as you will need someone with experienced shoulders to overcome any obstacles and potential delays, and a company that will provide you with a high level of service. Choosing a forwarder based on price can cost your business more in the long run.

A good freight forwarder will work out exactly what you need and breakdown their services – from container pickup from your warehouse, delivery through the port and loading onto the vessel. A local representative will also give you International shipping rates to get goods shipped through to the country of destination. Because freight forwarders move large volumes of shipments through several different shipping lines they will be able to give you better shipping rates than if you were to try to deal with shipping lines directly.

Your freight forwarder will have to receive all correct shipment details and paperwork from you so they can organize the export process. When you create all of your export documents using IncoDocs, you can email them directly through to your freight forwarder so they can streamline the export process.

There are a few things to understand in the difference between selling your goods on FOB (Free On Board) or CFR (Cost and Freight) terms.

If selling on FOB terms:

You will only have to cover the costs to get the goods loaded on board the vessel ready for export – so you will cover the container trucking from your warehouse to the port plus all of the port and stevedoring charges and loading fees.

If selling on CFR terms:

The International Freight charges will be billed back to you, the shipper. That means you will receive an invoice for the International Seafreight charge (usually in USD) which will usually be billed back to you through your freight forwarder. If you sell your goods on CFR terms then it gives you more control over your goods when on the water. You will remain the owner of the goods until the shipment has arrived at the port of delivery. In some cases, if you have agreed that the seller can make the balance payment for the goods after they have been shipped, then you can use your CFR terms as security by not handing over the original Bills of Lading to the buyer until you received the balance payment. The buyer can only clear the goods into their country once you have handed over the original Bills of Lading.

You must ensure that the International seafreight charge is paid before the goods arrive at the destination.

The exporter will offer their product details and pricing information to the buyer. The exporter must ensure that all information is clearly stated in correctly formatted sales documents - Quotation, Proforma Invoice, Order Confirmation & Purchase Order (Buyer)

Quotation

A quotation document will offer all details of the products and selling terms to the buyer. Exporters must ensure all information is clearly stated in a correctly formatted Quotation document to avoid any confusion or disputes relating to product quality, specifications, pricing, delivery terms and expectations. A badly formatted quote document reflects negatively on the company that is offering the goods for sale.

- Shippers Details (Exporter)
- Buyer's Details (Importer)
- Product Description - including item codes, description and specifications
- Product Quantities, Pricing and Currency
- Incoterm
- Shipment Type
- Payment Terms - as negotiated between buyer & seller
- Estimated supply lead times

Order Confirmation

The exporter can send an Order Confirmation document to the Importer to reconfirm all of the details of the new order. An order confirmation document is usually sent to the buyer after the buyer has issued a Purchase Order document to confirm the new order. The Exporter must ensure that all information is clearly stated in a correctly formatted Order Confirmation document to avoid having any disputes relating to product quality, specifications, pricing and delivery terms.

Buyers and Sellers will have to issue and counter-sign important Purchase Order and Proforma Invoice Contracts

Purchase Order

A Purchase Order is a document issued by the buyer of goods, sent to the seller of goods to confirm the details of products that are ordered. The Purchase Order is the official order document from the buyer's company that will contain all details of the new order. If the Purchase Order does not contain all relevant information it can cause confusion and delays to orders. The seller will also issue a Proforma Invoice document that will match all details of the buyer's Purchase Order. Both parties will have to counter sign both documents as these documents represent a legally binding agreement between the seller and buyer.

Proforma Invoice (or Sales Contract)

A Proforma Invoice is an important document that is created by the seller of goods. After the buyer has communicated the details of the products they want to order, the seller will create a Proforma Invoice to include all product details, quantities, pricing and delivery information. It is usually created after a quotation has been sent and when the sales process is moving closer to a confirmed deal. The Proforma invoice will include the seller's bank details so that the buyer can arrange payments as required.

Product Code: B-STOCK, B-TABLE
Description of Goods: B&G STOOL ALUMINUM 500 X 200 X 100MM STAINLESS STEEL, B&G TABLE ALUMINUM 2000 X 800 X 400MM STAINLESS STEEL

Unit Quantity: 1,000 EACH, 100 EACH
Unit Price: \$3.80, \$6.70
Amount: \$3,800.00, \$6,700.00

Total This Page: 1,000, \$6,500.00
Commitment Total: 1,000, \$6,500.00

Additional Information: 20 DAYS LEAD TIME AFTER DEPOSIT

Signature of Authorized Signatory: Randy Clarke, John Smith

Countersigning Proforma Invoices, Purchase Orders and Sales Contracts used in Global Trade

Countersigning proforma invoices, purchase orders and sales contracts requires both buyer and seller to add their company stamp or company seal, and their signature onto both documents.

Countersigned Proforma Invoices, Sales Contracts and Purchase Orders represent a legally binding agreement between the buyer and seller. If there are any problems or disputes relating to the order or shipments, these documents will be referred to in a court of law.

In the past, both buyers and sellers (importers or exporters) have had to manually print, sign, scan, upload then mail documents between each other. Throughout the history of trade, this has been the adopted process to get contracts signed.

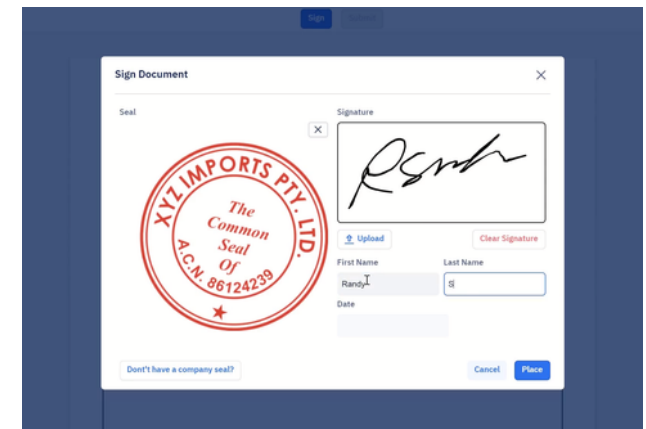

In today's world, buyers and sellers can now use IncoDocs to countersign each document to eliminate the manual print, sign, scan and email process. Importers and exporters are countersigning trade documentation to transition to paperless operations. This allows companies to close deals faster, sign contracts from anywhere, increase administration efficiency and reduce paper & operational costs.

Countersigning a Purchase Order

- 1 - The buyer creates a Purchase Order in IncoDocs, adds their company stamp or seal, inserts their electronic signature, then requests the document to be countersigned by the seller.
- 2 - The seller uploads their digital company stamp or seal and inserts their electronic signature.

Countersigning a Proforma Invoice

- 1 - The seller creates a Proforma Invoice in IncoDocs, adds their digital company stamp or seal, inserts their electronic signature, then requests the document to be countersigned by the buyer.
- 2 - The buyer uploads their digital company stamp or seal and inserts their electronic signature.

Get Paid Faster. Allow your buyers to click to pay invoices online.

When a deal is confirmed, the seller will usually share a Proforma Invoice requesting a deposit payment from the buyer. IncoDocs users can provide payment options on their invoices so that buyers have an easy 'click to pay' experience.

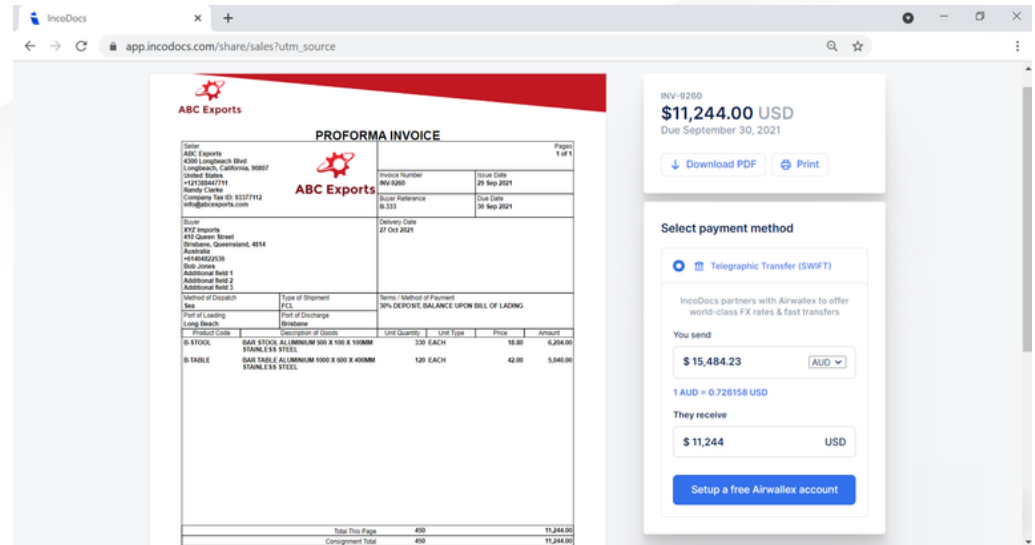

Sellers share documents to buyers that they can click to pay via Credit Card, or T/T transfer.

[Pay by Credit Card](#)

Buyers click to enter their credit card details to make payments directly to the seller.

[Pay by SWIFT Telegraphic Transfer \(T/T\)](#)

Buyers can get setup to make T/T payments with competitive exchange rates. This gives buyers the power to make fast, transparent and cost-effective International payments in multiple currencies.

Shippers must ensure they create compliant shipping documentation to pass off to the freight company to correctly arrange the export of goods. Errors will cause costly delays, fines and demurrage charges.

What shipping documents do you have to create?

You may be wondering exactly what documents you have to create to get your goods exported to your customer overseas? The exact documentation depends on a few factors including country of export, country of import, type of products, shipping methods etc. The shipper (exporter) must create complete and compliant export documents to ensure that shipments are correctly delivered through the port, cleared customs, meet all compliance and regulations, then loaded on board the correct vessel. All export documentation must be completed correctly to avoid any missed shipments, port demurrage charges or fines to your business.

IncoDocs ensures compliant shipping documents to get products exported without problems or delays.

Below is an overview and explanation of some of the most important shipping documents required for export:

- **Commercial Invoices**
- **Packing Lists**
- **Shipper's Letter of Instruction**
- **Forwarding Instruction**
- **Verified Gross Mass (VGM)**
- **Certificate of Origin (COO)**
- **Packing Declaration (ISPM15)**
- **Importer Security Filing (ISF)**
- **Manufacturer's Declaration**

Packing List

A packing list is a detailed document that states all of the product and packaging details of each shipment. Your freight forwarder will use this information when preparing the Bill of Lading with the shipping line so that the cargo can be moved around accordingly. It can be used by customs in the country of import to understand exactly how shipments are packaged and loaded to check product and packaging compliance and any import duties or taxes payable in the country of destination. Key information detailed in the packing list includes:

- Shipper and consignee name, address, contact details
- Measurements and total Net Weight and Gross Weight of cargo
- Detailed list of how goods are packaged and number of packages
- Any relevant shipping marks or seal numbers used
- Any other important information or special instructions related to the loading and packaging contained in the shipment

Shipper's Letter of Instruction (SLI)

A Shipper's Letter of Instruction (SLI) or Forwarding Instruction is an important legal document created between the exporter and the freight forwarder that is organising the export and logistics for your shipment. It is a detailed document which gives your freight forwarder all specific instructions relating to the export of your goods. The freight forwarder will use the Shipper's Letter of Instruction to correctly arrange transport of your cargo and provide customs with all product details used for statistical purposes and to make any extra special arrangements.

Verified Gross Mass Declaration (VGM)

The Verified Gross Mass (VGM) declaration is a very important legal document. This document represents a statement of total mass in accordance with International Maritime Organization (IMO) Verified Gross Mass requirements (SOLAS). You must ensure this document is completed correctly to ensure safe shipments and avoid huge fines!

Packing Declaration (ISPM15)

A packing declaration is an important document which states the type of packing materials that are used to pack the goods inside your container. It is to ensure that any timber packaging used are ISPM15 compliant, to protect the spread of insects and disease which can be hiding away in timber packaging materials such as pallets, create and dunnages. The shipper will have to provide a statement on company letterhead which states the type of packing materials used and if they have been treated or marked in compliance with ISPM15 or DAFF fumigation treatment requirements.

Certificate of Origin (COO)

The importer will request that the shipper provides a signed and stamped Certificate of Origin so that they can give this to their customs agent when importing into their country to reduce or eliminate import duty fees. It is important to note that the importer will require this Certificate BEFORE the shipment arrives so that they can pass onto their customs clearance agent.

Importer Security Filing (ISF) - for inbound shipments to the USA

If you're shipping goods to the USA, you will have to be aware of the Importer Security Filing process so that important information can be transmitted on time. The ISF is a filing process that is required by the United States Customs and Border Protection (CPB) which requires import containerized cargo information. The information must be transmitted to the agency at least 24 hours before goods are loaded onboard a vessel to the USA. If the ISF is not transmitted in time penalties of up to US\$5,000 can apply.

The ISF is also known as a "10+2" as it requires importers to provide 10 data elements to CBP and 2 other documents from the carrier of goods (shipping line). An ISF document can be created to contain all of this information to be passed on to different parties.

- Manufacturer (or supplier) name and address
- Seller (or owner) name and address
- Buyer (or owner) name and address
- Importer of record number, name and address
- Consignee number(s)
- Country of origin
- Ship-to name and address
- Container stuffing location
- Consolidator (stuffer) name and address
- Commodity Harmonized Tariff Schedule number for each product on the shipment
- Master bill of lading number
- House bill of lading number (if applicable)

Manufacturer's Declaration

A manufacturer's declaration is a flexible document that usually contains statement from the issuing company. The document can be used for many purposes, including Newly Manufactured Declaration, Non-Asbestos Declaration, New Prefabricated Units Declaration & New Shipping Containers Declaration.

The top of the document will include the Manufacturer's details (including name and address), the middle section will contain a general statement from that company. The bottom of the document will include a signature from an authorized representative from the company.

How to use Container Loading Software to Optimize Shipping Costs

Container loading software helps shippers accurately calculate loading and stuffing plans. In the case of consolidating different products into one container, it can be a challenge to correct load and stuff the containers to make maximum use of it's capacity. Shipping fully loaded, instead of partially empty containers will save you money.

This is where truck and container loading software will benefit your business. Users can plan the loading of many different types of shipping containers or trucks. Users then add the dimensions and weights of goods to be loaded inside the containers.

A 3D visualization will give users an understanding of exactly how much cargo can be loaded and stacked for shipment. Users can adjust cargo by moving, rotating and stacking objects to optimize loading space inside the shipping container. The cargo visualization will show important data such the number of loaded cargo, the total weight of the load, the volume of all loads and the amount of free cubic meters.

When the loading calculation is complete, the finished project can be shared with a 3rd party, or printed and saved.

 [Try Container Loading Software](#)

Global Trade Finance enables exporters and importers to get fast access to finance to get products manufactured and shipped Internationally.

Import Export Finance is often required as importers usually place new orders for high value bulk shipments that require an upfront cost to manufacture. There is considerable risk to assess when producing a high volume of products. Cashflow and working capital management are fundamental for exporters, importers and trading companies.

The main benefit of having a suitable import export finance solution is that it will provide the seller or buyer with upfront finance to make deposit or balance payments for the goods to be manufactured and shipped. Different trade finance options usually provide finance on 30-120 day terms.

Using Export Trade finance, sellers do not have to dilute equity to allow their business to grow. It allows exporters and importers to remain working capital positive, to focus on optimizing operations & growth and expand into new markets. Receiving finance up front hedges and reduces the risks of financial defaults. It also enhances the speed of confirming new deals and reduces the time between manufacturing and loading goods on board vessels for export.

How to Apply for Global Trade Finance.

Depending on the type of facility that you need, providers will need to get an understanding of your business and your import export operations. Generally, if you already have a history of dealing with companies Internationally, it can make the approval process easier.

Get Connected with a Trade Finance Provider

How to Calculate the Landed Cost of Imported Goods

Businesses must have a good understanding of what the landed cost of imported products will be in advance so that they can make smart decisions for their business. If a business is planning to import products and on-sell them in their market, then they must have a good idea of what the actual final landed cost is for each item.

Understanding the landed cost of imported products allows business to plan how much capital will have to be invested to purchase products and get them delivered through to location. On top of that, it also helps businesses to plan their sell prices and profit figures that will eventuate when the products are sold. If businesses do not take the time to understand their landed cost, they could be faced with unexpected fees and charges which could make importing the products nonviable. Calculating the landed cost requires an understanding of some key costs and correctly applying them to each product to get the final landed cost per item. [Read the full article with examples of landed cost calculations here.](#)

Use a Landed Cost calculator

Calculating the landed cost per item can be a long, time consuming process. On top of that, if you make any mistakes in the calculations then your projections could be well under or over the actual charges. To support importers during the landed cost process, our team created a simple to use Landed Cost Calculator.

The International shipping and marine transport industry is full of unique shipping terms and shipping abbreviations. And these are used every day to describe everything from modes of transport, units of measure, pricing structures, IncoTerms and much more.

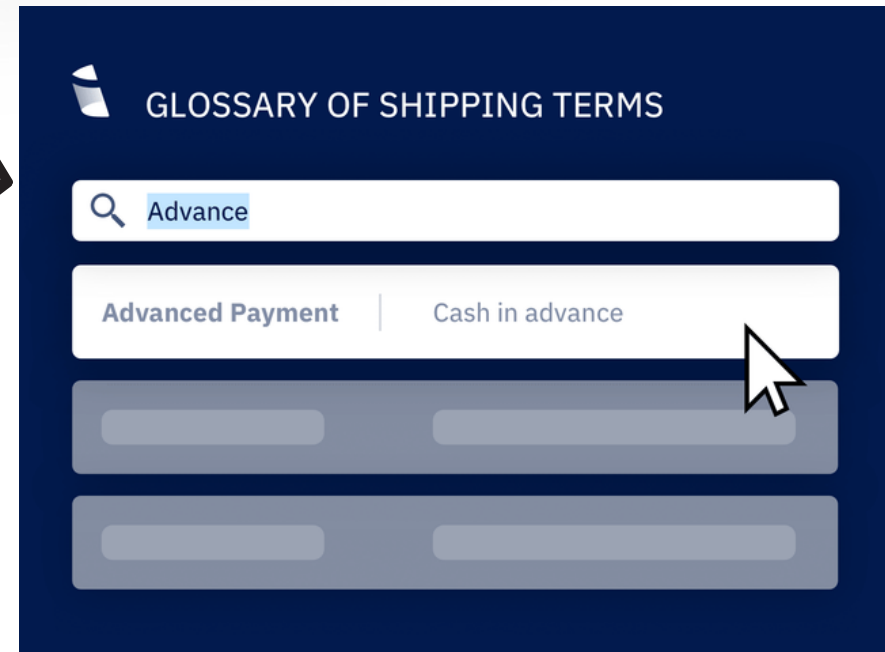

It's important that importers, exporters and freight companies correctly communicate freight terms to avoid problems or disputes arising from misunderstanding them.

We've put together this shipping glossary chart to help you navigate global trade.
